## PROGRAM

# 1<sup>st</sup> Instructional Course

for Orthopaedic Surgeons

# Anatomical Hip Reconstruction in Total Hip Arthroplasty

October 11<sup>th</sup> 2012

“Radisson Blu Hotel”  
Zurich Airport, Switzerland

Dear Colleagues,

Since its introduction in routine clinical practice, hip arthroplasty has seen a tremendous development, making it one of the most successful surgical interventions today. The initial aim was to simply replace the joint to reduce pain. The focus then shifted towards the anatomical reconstruction of a normal anatomy, thereby restoring a normal function.

We cordially invite you to this symposium, where certain aspects of primary modern hip arthroplasty will be discussed. We are pleased to announce that a number of distinguished experts will share their views on the subject.

Warm Regards,

Patrick Zingg

Hannes Rüdiger

The Swiss Orthopaedic Association (SGOT, SSOT)  
Awards this course with 8 CME-points.

## Program

Thursday October 11<sup>th</sup>, 2012

09.30-10.00	Registration	
10.00-10.10	Welcome	P. Zingg H. Rüdiger
10.10-10.30	Residual pain after hip reconstruction	C. Dora
10.30-11.00	Biomechanics of total hip	Ph. Damm
11.00-11.30	Different concepts of total hip designs	H. Rüdiger
11.30-11.50	Conventional planning of THR	P. Zingg
11.50-12.30	CT based 3D planning of THR	H. Sari Ali
12.30-13.00	Lunch	
13.00-13.30	Technical aspects & cost effectiveness of 3D planning	A. Huppertz
13.30-13.45	Surgical reproduction of 3D planning	H. Rüdiger
13.45-14.15	Various stem designs in comparison	M. Wettstein
14.15-14.45	Characteristics of different pairings	R. Preuss
14.45-15.00	Revision solutions for ceramic pairings	C. Helfrich
15.00-15.30	Coffee Break	
15.30-16.00	Outcome THR with anatomical stems	H. Sari Ali
16.00-16.30	Results with Custom made stems	J.N. Argenson
16.30-16.45	Is it worthwhile planning 3D and using anatomical stems?	P. Zingg
16.45-17.00	Closing comments	H. Rüdiger P. Zingg
